Instruction To Bidders

\$500 per day after Final Completion Date (August 15, 2021)

Liquidated damages will be assessed per calendar day after the Beneficial Occupancy Date as defined per the Project Schedule included in the project Bid Manual. Beneficial Occupancy shall be defined as an area being able to be used for the purpose for which it was intended and as described in Article 1 of the General Conditions of the contract.

18. General

- 18.1. All references in the Contract Documents to work being provided by the "General Contractor", "Contractor", "Construction Manager at Risk", "Construction Manager", or any other similar language, shall inferably be provided by the applicable trade Subcontractor(s) as designated by the Bid Package Description(s).
- 18.2. The term "provide" means to furnish and install, including all labor, materials, supervision, equipment, tools, storage, insurance, taxes, applicable bonds, and all other items to perform the work.
- 18.3. The term "include" means to furnish and install, including all labor, materials, supervision, equipment, tools, storage, insurance, taxes, applicable bonds, and all other items to perform the work.
- 18.4. The term "furnish" means to supply materials, including delivery, taxes, and applicable bonds. Coordinate all deliveries with the receiving Subcontractor.
- 18.5. The term "install" means to receive, inventory, sort, store, distribute, and install, including all labor, supervision, equipment, tools, storage, insurance, taxes, applicable bonds, and all other items necessary for the installation of the work.
- 18.6. The term "maintain" means to assume all responsibility for, to maintain structural integrity of, and to keep in proper working order for the duration of the Project, or until no longer required as directed by W. M. Jordan, Inc.
- 18.7. Addenda: Formal changes or clarifications issued by the Owner or Owner's representative to all identified bidders during the bidding period. When modifications are not included in the original bid documents, the issuance of addenda is a process by which bidders can be updated on design changes and clarifications. If such changes or modifications were made after the contract award, these items of work have to be addressed as changes.
- 18.8. Alternates: Ideally, on a lump sum contract the low bidder will be determined as the party submitting the lowest bid. The determination and selection of the lowest bidder are made more complex when the Project includes alternates. Alternates can be viewed as modifications to the base bid. They may consist of changes in the structure of a project, changes in the quality of the material to be furnished, the inclusion of additional items of work, the deletion of specified work items, and so on.

Instruction To Bidders

- 18.9. Base Bid: Refers to the Total Lump Sum price for all the work outlined in the scope of work, and specified in the contract documents.
- 18.10. Bid Bond: Issued to give assurances that the Subcontractor will enter into a binding construction contract and will provide the required payment and performance bonds if the contract is awarded to him/her. If the Subcontractor fails to do this (sign the contract and furnish the required bonds), the bond stipulates that a responsible party (the surety) will pay the damages.
- 18.11. Bid Form: The bid documents usually include a bid form on which the bids are to be submitted. There are very compelling reasons to use a specified bid form for all bidders. This form will facilitate analysis and comparison of the bids so that irregularities can be detected quickly. For Subcontractors it ensures accuracy in providing the necessary information and prevents the possibility of having omissions in the bids.
- 18.12. Payment Bonds: Gives protection to the Owner if the Subcontractors and suppliers are not paid by the prime Contractor. Payment bonds prevent liens. Basically, the Subcontractors are paid by the surety if the Contractor fails to pay them.
- 18.13. Performance Bonds: Assures that a financially responsible party will stand behind the prime Contractor if he or she does not perform properly. These bonds usually state a specified dollar amount as a limit to the liability of the surety.
- 18.14. Unit Prices: Unit Prices are used when the Project is fairly well defined but the actual quantities may be difficult or impossible to estimate the accuracy until after construction has started. Thus, the unit price is utilized as a means to establish the payment to be made to the Subcontractor based on precise measurements of in-place field quantities.

Thank you for your interest in this project and good luck on bid day.

W. M. Jordan Company, Inc. looks forward to the possibility of doing business with your company.
