PUBLIC AREA FF&E SPECIFICATIONS

PALETTE A "CHELSEA"

Introduction

The Home2 Chelsea and Tribeca prototypical décor packages have been thoughtfully designed and carefully vetted by Hilton. This current set of specifications replaces the previous "design intent" specifications with no changes to the overall aesthetic quality. The suppliers and their products were chosen after an extensive and rigorous vetting process and represent a high quality, more economical and streamlined solution for Home2. The package is pre-approved and if used in its entirety may help expedite project approvals. Refer to Project HUB for submittal requirements.

Within this document are the specifications needed to implement a Home2 Suites Brand guest room scheme. Along with the Design Brief, the Home2 Suites Brand Standards Manual and the Architectural Prototype Drawings, these specifications will assist the designer in completing either a new build or renovation Home2 Suites Brand property.

The specifications are divided into two sections: Specifications and Finishes. The prototypical specifications coordinate with the current Home2 Suites Brand prototype room types. For renovations, designers will use the prototypical specifications. The finish portion provides specifications that act as a guide to selecting the materials needed for a complete guest room.

If there are any questions about how to use this document, any specific project needs or interpretation of prototypical specifications, please contact Architecture, Design & Construction at design.review@hilton.com

All interior design submittals must be presented to Focus.Hilton.com for review prior to implementation.

Negotiated pricing is available through Hilton Supply Management. Please contact Victor Elian victor.elian@hilton.com for more information.

PUBLIC AREA FF&E SPECIFICATIONS

PALETTE A "CHELSEA"

Supplemental Information

The below documents can be found on the designinformation.hilton.com site (username and password are "hilton20xx", where XX is the current year).

- Design Brief: This document gives a designer all the reasons why the Brand is what it is. It helps establish uniformity of practice, consistently express the brand identity and serves as a guide for Interior Design and FF&E selection. This manual drills down even further with details on how to develop a Home2 Suites Brand guestroom and bath. It discusses the specific elements required and describes how the room design assists in letting the guest choose how the room functions.
- The Home2 Suites Standards Manual: This document lists the minimum standards, procedures, rules, regulations, policies and techniques required by the Home2 Suites Brand and Hilton.

Definitions

- Pre-Approved Vendors: Unless marked as "Required", Vendors listed herein are considered pre-approved due to their participation in an extensive product development and vetting effort. Pre-approved vendors have the necessary experience with specific products. For non-required items an owner/designer may use a vendor of their choice outside the bounds of this list, however those suppliers must be approved through the design review process on an individual project basis.

PLEASE NOTE:

1. All upholstered specifications are fabric inclusive when using the approved suppliers within the Hilton prototype package.
2. Vendors listed on enclosed specification sheets are the approved suppliers for the prototype package. All other vendors will be required to obtain an approval on a project by project basis.
3. For custom items and packages, owners are encouraged to use the program suppliers, or a list of recommended vendors are listed on [Suppliersconnection.hilton.com](https://suppliersconnection.hilton.com).
4. It is the Owner's/Designer's responsibility to maintain the design intent and adapt all required guestroom elements to their property's conditions prior to fabrication and installation.

Always reach out to your Hilton design contact at the start of every design effort to ensure you are up to date on the most current information.

Notes:	<ul style="list-style-type: none"> • Manufacturer to verify size requirements by on-site measurements taken prior to fabrication. • Manufacturer to provide template to coordinate fabrication of top and base. All pieces to be mechanically secured together. Provide all corrosion proof hardware to secure pieces together. • Overhead storage to have tackable pin-up surface on employee side. • Provide one pair side-mounted, ball bearing action, full extension, soft close drawer glides per drawer/tray. Must be suitable for weight of drawer. • Provide heavy-duty adjustable levelers. 		

Unless Using A Specified Manufacturer, The Following Required Item(s) for Approval Prior to Fabrication:
Finish Sample, Shop Drawings

Instructions:

- Drawings and specifications represent prototypical conditions. It is the responsibility of the owner to interpret these specifications for each property and in compliance to state and local codes.
- All interpretations of the specification MUST be submitted to Hilton Design Review (Design.Review@Hilton.com) for final approval prior to purchasing or implementation of any material.
- All materials and methods of construction must comply with all local fire and life safety codes for use in hotels and other public spaces, and Home2 Suites Brand Standards.
- All quantities to be verified by hotel operator prior to purchasing.
- Must be of contract quality and suitable for commercial use.
- Manufacturer to clearly mark each carton with item ID and specification number.
- Show all pieces in shop drawings. Provide reproducible scaled shop drawings to Hotel Operator Representative for approval prior to production.
- Manufacturer to verify all necessary parts, hardware and dimensions required for assembly. Manufacturer to include all necessary hardware with each item. All internal hardware (hinges, screws, bolts, etc.) shall be corrosion proof.
- Fabricator must provide a structurally sound product with proper proportions to insure stability and prevent tipping.
- Metal fasteners should be used where appropriate to ensure commercial frame strength.
- Rails and frame to be double doweled, screwed and glued. All wood to be kiln dried and treated to be insect and vermin free.
- Milled steel with all joints welded, filed and ground smooth. Provide proper support for size of specified piece to avoid racking and twisting.
- Major joints, as needed, shall utilize lap joints or double doweled construction with corner blocks. Reinforce joinery with glue and staples. Reinforce all necessary corners with hardwood corner blocks.
- Finish goods containing composite wood products must comply with California Code of Regulations 93120. Product and carton will be labeled in accordance with this regulation.
- Entire frame shall be inspected during the manufacturing and again after final assembly.
- Manufacturer/Fabricator to provide Hotel Operator Representative with three 12"(30cm) x 12"(30cm) finish samples for approval prior to production.

Revision Date:	November 2019		

- Notes:
- Manufacturer to verify size requirements by on-site measurements taken prior to fabrication.
 - Manufacturer to provide template to coordinate fabrication of top and base. All pieces to be mechanically secured together. Provide all corrosion proof hardware to secure pieces together.
 - Manufacturer to provide adequate ventilation and air circulation to house computer equipment. Provide 1.5" (40mm) diameter holes for cords.
 - Provide one pair side-mounted, ball bearing action, full extension drawer glides (accuride or equal) per drawer/tray.
 - Provide heavy-duty adjustable levelers.
 - All cabinets and drawers to have same keyed locks.

Unless Using A Specified Manufacturer, The Following Required Item(s) for Approval Prior to Fabrication:
Finish Sample, Shop Drawings

Instructions:

- Drawings and specifications represent prototypical conditions. It is the responsibility of the owner to interpret these specifications for each property and in compliance to state and local codes.
- All interpretations of the specification MUST be submitted to Hilton Design Review (projecthub.hilton.com) for final approval prior to purchasing or implementation of any material.
- All materials and methods of construction must comply with all local fire and life safety codes for use in hotels and other public spaces, and Home2 Suites Brand Standards.
- All quantities to be verified by hotel operator prior to purchasing.
- Must be of contract quality and suitable for commercial use.
- Manufacturer to clearly mark each carton with item ID and specification number.
- Show all pieces in shop drawings. Provide reproducible scaled shop drawings to Hotel Operator Representative for approval prior to production.
- Manufacturer to verify all necessary parts, hardware and dimensions required for assembly. Manufacturer to include all necessary hardware with each item. All internal hardware (hinges, screws, bolts, etc.) shall be corrosion proof.
- Fabricator must provide a structurally sound product with proper proportions to insure stability and prevent tipping.
- Metal fasteners should be used where appropriate to ensure commercial frame strength.
- Rails and frame to be double doweled, screwed and glued. All wood to be kiln dried and treated to be insect and vermin free.
- Milled steel with all joints welded, filed and ground smooth. Provide proper support for size of specified piece to avoid racking and twisting.
- Major joints, as needed, shall utilize lap joints or double doweled construction with corner blocks. Reinforce joinery with glue and staples. Reinforce all necessary corners with hardwood corner blocks.
- Finish goods containing composite wood products must comply with California Code of Regulations 93120. Product and carton will be labeled in accordance with this regulation.
- Entire frame shall be inspected during the manufacturing and again after final assembly.
- Manufacturer/Fabricator to provide Hotel Operator Representative with three 12"(30cm) x 12"(30cm) finish samples for approval prior to production.
- Insure that pieces will fit in elevators and through doors prior to commencing fabrication.

Item Number:

(A) PA-402

Area Name: **Lobby**

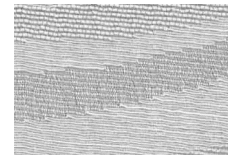

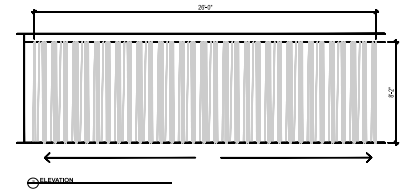

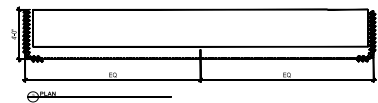

Item Description:

Roller Shade @ Lobby

Revision Date: **November 2019**

- Drawings and specifications represent prototypical conditions. It is the responsibility of the owner to interpret these specifications for each property and in compliance to state and local codes.
- All interpretations of the specification MUST be submitted to Hilton Design Review (projecthub.hilton.com) for final approval prior to purchasing or implementation of any material.
- All materials and methods of construction must comply with all local fire and life safety codes for use in hotels and other public spaces, and Home2 Suites Brand Standards.
- All quantities to be verified by hotel operator prior to purchasing.
- Manufacturer to clearly mark each carton with item ID and specification number.
- Must be of contract quality and suitable for commercial use.
- All quantity requirements must be verified by on-site. Measurements taken prior to fabrication.
- Fabricator is responsible for the size and quantity of all hardware to be used. Provide all hardware complete for installation.
- All metal parts must be guaranteed rust, corrosion, and scratching resistant.
- Draperies must meet Class 1 ASTM E-84 and NFPA 701 Small and Large Scale as required by local and state fire codes for use in hotels.
