### Michael Jordan Family Medical Clinic Project

TA Woods was honored to install the plumbing systems at the Michael Jordan Family Medical Clinic, located at **1423 Greenfield St., Wilmington, NC**. This state-of-the-art facility is designed to provide accessible healthcare to individuals of all ages and backgrounds, regardless of insurance status. The dedicated care team at the clinic helps patients access essential health resources, ensuring no one is left without support.

TA Woods began site work in May 2024 and completed the plumbing systems in January 2025 under the leadership of **Project Manager Matt Goleniak** and **Field Project Manager Chris Rugado**.

To meet the clinic's high-traffic demands, TA Woods installed heavy-duty, commercial-grade fixtures, including patient care modules and surgeons' scrub sinks. These robust systems ensure durability and reduce maintenance needs, allowing the clinic staff to focus on patient care instead of frequent repairs.

In a healthcare environment where reliability and adaptability are paramount, TA Woods delivered flexible and easy-to-maintain plumbing systems designed to minimize disruptions and support the clinic's mission of providing uninterrupted, quality care.

Explore photos of our work, including the plumbing system, hot water tank, and sink installations, which demonstrate our commitment to excellence in healthcare construction.
